

Athlete's POV (APOV) — UI Feature Extraction & Business Model Reconstruction

Date: 2026-06-17

STEP 1 — IDENTIFY APPLICATIONS

The Athlete's POV (APOV) platform consists of four distinct user-facing applications:

1. AthletePOV User App (Mobile-first Web App)

Purpose : Enables athletes and sports enthusiasts to discover sports turfs, courts, and facilities, view real-time slot availability, reserve and pay for slots, track gamified milestones, register for local tournaments, and communicate with venue hosts.

Target Audience : General public, casual sports players, amateur athletes, and team managers.

2. AthletePOV Partner App (Mobile-first Management Web App)

Purpose : Allows sports venue owners and facility operators to register their businesses, upload KYC documentation, configure venue characteristics, set up playing schedules (slots) with dynamic pricing, block/unblock slots, manage bookings, view revenue/analytics, and reply to reviews.

Target Audience : Venue owners, facility managers, sports academy operators, and staff members.

3. AthletePOV Admin Portal (Desktop Web Application)

Purpose : Centralized administration console for platform owners. Used to approve partners and listed venues, manage disputes, verify KYC documents, configure gamified user milestones, issue promotional coupons, monitor user-partner chat logs, schedule broadcast notification campaigns, and moderate user reviews.

Target Audience : Platform operations, customer support, and system administrators.

4. Landing Website

Purpose : Public-facing promotional portal introducing the platform's benefits, displaying featured venues, and providing action prompts (CTAs) for users to sign up or download the app.

Target Audience : General visitors, prospective athletes, and potential venue owners.

STEP 2 — EXTRACT ALL UI FEATURES

The following table catalogs every visible UI component, interactive element, and feature extracted from the JSX source codes:

	Feature Name	Purpose	User Type	Page Location	Status	
	:---	:---	:---	:---	:---	
	Carousel Slide Banner	Promotes active tournaments and deals	User	User Landing / Home Tab	Partially Implemented (Mock Carousel)	
	Location Prompt / Selection	Requests GPS coordinates or manual city input	User	Location Screen	Partially Implemented (Mock GPS/City)	
	Venue Search & Filter	Searches name/area, filters by sport/area, sorts by price/rating	User	Home Tab (main)	Partially Implemented (Mock Filters)	
	Venue Detail Panel	Shows photos, address, amenities list, and rating/reviews	User	Venue Detail Screen	Partially Implemented (Mock View)	
	Date Picker Calendar	Selects target booking date for scheduling slots	User	Venue Detail Screen	Partially Implemented (Mock Selection)	
	Dynamic Slot Grid	Shows slot timings, base prices, and states	User	Venue Detail Screen	Partially Implemented	

		(Booked/Available/Unavailable)			(Wired with SlotButton)	
	Coupon Code Form	Input box to apply discounts on total order price	User	Booking / Checkout Screen	Partially Implemented (Wired with wallet)	
	Razorpay Payment Gateway	Triggers card/UPI checkout popup overlay	User	Booking / Checkout Screen	Partially Implemented (Integration guide)	
	Pay at Venue (PAV) Toggle	Splits payment: 30% online deposit + 70% paid at turf	User	Booking / Checkout Screen	Partially Implemented (UI and API ready)	
	QR Code E-Ticket	Displays booking details and check-in QR code	User	Booking Confirmation Screen	Partially Implemented (QR Code Mock)	
	Cancellation Modal	Requests reason string before cancelling a slot booking	User	My Bookings Tab	Partially Implemented (Cancellation ready)	
	Refund Status Badge	Displays whether refund is credited or initiated	User	My Bookings Tab	Partially Implemented (Wired in Sprint 6)	
	Wishlist Heart Toggle	Saves venues to personal favorites list	User	Home Card / Detail Header	Partially Implemented (Syncs on login)	
	Review Submission Box	Selects stars (1-5) and enters text feedback on played venues	User	Venue Detail Screen	Partially Implemented (Saves locally)	
	Notification Center Drawer	Side/full-screen panel showing inbox alerts filtered by category	User / Partner	Header Bell Button	Partially Implemented (Wired in Sprint 6)	
	Gamification Milestone Badges	Shows unlocked badges (First Booking, Hat Trick, Regular)	User	Statistics Screen / Profile	Partially Implemented (Mock badges)	
	Tournament Registration Modal	Registers teams for tournaments with fee checkout	User	Tournaments Tab	Partially Implemented (Razorpay wired)	
	AI Assistant Chat overlay	Interacts with AI support chatbot with venue context	User / Partner	Bottom Right Chat Bubble	Partially Implemented (Wired in Sprint 6)	

Today's Bookings Widget	Lists bookings scheduled for today	Partner / Admin	Dashboard Home	Partially Implemented (Wired in Sprint 6)	
E-Ticket QR Scanner Screen	Check-in tool using camera stream or manual code check	Partner	Header QR Scanner Button	Partially Implemented (Camera is placeholder)	
KYC File Uploader	Uploads GST, PAN, or Bank statement to AWS S3	Partner	Profile Tab	Partially Implemented (S3 Presign ready)	
Disputes Feed	Displays open booking complaints and allows submitting responses	Partner	Payments Tab / Sidebar	Partially Implemented (Wired in Sprint 6)	
Review Reply Box	Partner submits public responses to user reviews	Partner	Home / Reviews Panel	Partially Implemented (Wired in Sprint 6)	
8-Step Venue Setup Wizard	Sequenced forms (basics, sport, price, hours, photos) to list turf	Partner	Venues Tab	Partially Implemented (Mock wizard)	
Slot Manager / Grid Builder	Date-specific time checkboxes to create/block/unblock slots	Partner	Venue Detail Panel	Partially Implemented (Wired in Sprint 6)	
KYC Document Viewer Modal	Inspects partner docs (PDF/Img) with Verify/Reject actions	Admin	Partners Tab	Partially Implemented (Wired in Sprint 6)	
Milestone Configuration Form	Configures milestone booking counts and coupon rewards	Admin	Users Tab (Milestones sub)	Partially Implemented (Wired in Sprint 6)	
Venue Approvals Controller	Buttons to Approve, Reject (with reason), or Suspend venues	Admin	Venues Tab	Partially Implemented (Auto-notifies host)	
Slot Reassignment Tool	Changes booking slots manually for players	Admin	Bookings Tab	Partially Implemented (Wired in Sprint 6)	
PAV Outstanding Ledger	Lists outstanding cash amounts due from partners	Admin	Finance Tab	Partially Implemented (Wired in Sprint 6)	

	Commission Rate Editor	Adjusts platform fee % globally or per partner	Admin	Finance Tab	Partially Implemented (Deductions active)	
	Surge Price / Demand Tags	Adds Surge, High Demand, or Discount multipliers to slot groups	Admin	Slots/Demand Tab	Partially Implemented (Wired in Sprint 6)	
	Broadcast Composer Form	Prepares push notifications targeted by city, role, or sport	Admin	Notifications Tab	Partially Implemented (Wired in Sprint 6)	
	Message Compliance Monitor	Views and checks active user-partner chat logs	Admin	Messages Tab	Partially Implemented (UI mock)	
	Dark Mode Switch	Toggles dark/light color variables	Partner / Admin	Sidebar / Profile Footer	Fully Implemented	

STEP 3 — USER FEATURES

User Feature Inventory

	Feature	Screen	Purpose	Status	
	:---	:---	:---	:---	
	OTP Registration / Login	Login Screen	Secures login via SMS OTP verify	Partially Implemented (Guide wired)	
	Profile Management	Profile Tab	Updates personal fields (DOB, Gender, Lang)	Partially Implemented	
	Venue Discovery & Filters	Home Tab	Finds turfs by sport, area, and sorting options	Partially Implemented	

	Venue Details & Reviews	Detail Screen	Inspects court photos, amenities, and user reviews	Partially Implemented	
	Date & Slot Selection Grid	Detail Screen	Selects target slot time showing price and status	Partially Implemented (Blocked vs Booked)	
	Convenience Fee & Checkout	Booking/Payment	Calculates 4% fee, applies coupons, initiates pay	Partially Implemented (Surge ready)	
	Razorpay Card/UPI Checkout	Payment Screen	Opens payment gateway popup for online booking	Partially Implemented (Razorpay wired)	
	Pay at Venue (PAV) Split	Payment Screen	Splits booking fee (30% online deposit)	Partially Implemented (Wired)	
	E-Ticket & QR Display	Booking Confirmed	Generates ticket code and entry check-in QR	Partially Implemented	
	Booking Cancellation Flow	My Bookings Tab	Releases booked slot, requests cancellation reason	Partially Implemented	
	Refund Tracking Badge	My Bookings Tab	Shows cancellation refund status to user	Partially Implemented (Wired in Sprint 6)	
	Coupons Wallet	Coupons Tab	Stores and copies active promotional coupons	Partially Implemented	
	Wishlist Favoriting	Wishlist Tab	Quick access to wishlisted venues	Partially Implemented	
	Gamified Badges & Stats	Statistics Tab	Displays play hours, booking	Partially Implemented	

			metrics, unlocked badges		
	Tournament Entry & Sign- up	Tournaments Tab	Searches tournaments and registers team with fee	Partially Implemented (Wired)	
	AI Assistant Chatbot	Bottom Overlay	Answers venue and booking questions instantly	Partially Implemented (Wired in Sprint 6)	
	Notification Center Drawer	Header Bell	Lists all push notifications by categories	Partially Implemented (Wired in Sprint 6)	

User Actions & Screen Access

Registration & Social Login : Users open the app, skip splash, and arrive at the landing screen. Clicking "Get Started" or "Login" routes to the ****Login Screen****. Users enter their phone number to receive a 6-digit OTP, or log in using email/password. Social options (Google/Apple) are present as buttons.

Finding & Filtering Venues : From the ****Home Screen****, users select their city. They can search via a search bar or filter by clicking sport buttons (Football, Cricket, Badminton). A sorting drawer allows sorting by Price (Low/High) or Rating.

Booking a Turf Slot : Clicking any venue card opens the ****Detail Screen****. The user picks a date, and the slot grid displays available slots. Clicking a slot toggles selection. Clicking "Book Now" opens the ****Booking/Payment Screen****.

Payment & Confirmation : The checkout screen shows details and payment options (Razorpay/PAV). Applying a coupon updates the total. Clicking pay opens the Razorpay popup. Upon payment completion, it redirects to the ****Booking Confirmed Screen**** displaying the E-Ticket QR code. It should as be a downloadable pdf.

Cancelling & Tracking Refunds : In the ****My Bookings Screen**** (accessed via bottom nav), users see a list of bookings (upcoming, cancelled). Clicking "Cancel" on an upcoming booking opens a modal inputting cancellation reason. Once cancelled, a status badge dynamically tracks if the refund was initiated or completed.

Milestones & Stats : Users select the "Statistics" tab from the bottom navigation to view total play metrics and milestone cards. Milestones change color from locked (grey) to unlocked (vibrant badges) depending on the user's total booking count.

Joining Tournaments : Users navigate to the "Tournaments" tab, click "Register" on an open tournament card, type in their team name, and proceed to pay the tournament fee to confirm their registration.

STEP 4 — PARTNER FEATURES

Partner Feature Inventory

	Feature	Screen	Purpose	Status	
	:---	:---	:---	:---	
	Partner OTP Verification	Partner Login	Secures host account login via phone OTP	Partially Implemented (Wired)	
	Earnings Dashboard	Home Tab	Displays total bookings, active venues, total earnings	Partially Implemented	
	Today's Bookings Feed	Home Tab	Monitors upcoming customer sessions for check-ins	Partially Implemented (Wired)	
	E-Ticket QR Scanner	Home Header	Scans player QR code or enters ticket ID manually	Partially Implemented (Camera placeholder)	
	Review Reply Submissions	Home Tab	Allows hosts to respond directly to customer reviews	Partially Implemented (Wired in Sprint 6)	
	Disputes Inbox	Payments Tab	Displays customer booking disputes, takes responses	Partially Implemented (Wired in Sprint 6)	

	8-Step Venue Creation	Venues Tab	Multi-step form to add new court/turf assets	Partially Implemented	
	Slot Scheduling Console	Venue Detail	Sets time intervals, base prices, publishes schedules	Partially Implemented	
	Slot Block/Unblock toggle	Venue Detail	Blocks specific hours for offline events or maintenance	Partially Implemented (Wired)	
	Tournament Host Form	Venues Tab	Launches tournaments at selected venues	Partially Implemented (Wired in Sprint 6)	
	Hourly Demand Analytics	Analytics Tab	Chart drill-down of slot demand across hours of day	Partially Implemented (Wired in Sprint 6)	
	CSV Earnings Export	Analytics Tab	Downloads Excel-compatible CSV reports of earnings	Partially Implemented (Wired in Sprint 6)	
	Payout Bank setup	Payments Tab	Input forms for Account Number, IFSC, UPI ID	Partially Implemented	
	KYC File Submissions	Profile Tab	Uploads verification images (GST, PAN, Statement)	Partially Implemented (S3 ready)	
	Dark Mode Toggle	Profile Tab	Toggles interface color palette	Fully Implemented	

Partner Actions & Screen Access

Onboarding & KYC : Partner registers at the ****Partner Login Screen**** using OTP. To list a venue, they must go to the ****Profile Tab**** and upload GST/PAN credentials. Uploading documents tracks progress (0% to 100%) through AWS S3.

Listing a Venue : In the ****Venues Tab****, the partner clicks "+ Add Venue", launching an 8-step wizard: entering venue name, sport type, address, base pricing, operational timing, facilities, photos, and a final preview checklist.

Scheduling Turf Slots : In the ****Venues Tab****, partners select a venue to open its dashboard. They pick a date and select time check-boxes to create slots. They can set pricing for individual hours and click "Create Slots."

Blocking Timings (Offline reservation): If a walk-in customer books offline, the partner navigates to the slot grid on that date, selects the specific timing, and clicks "Block Slot." The slot updates to a grey striped "Unavailable" state on both the user app and partner app.

Checking In Players (Check-in Scanner) : When players arrive, the partner clicks "Scan Ticket" at the top of the ****Home Tab****. This opens the scanner overlay. The partner can scan the user's e-ticket or input the ticket code manually. Clicking check-in marks the session complete.

Resolving Booking Disputes : When users raise a payment dispute, a flag triggers in the partner's Payments section. The partner opens the ****Disputes Tab****, reviews the user's claim, inputs a response/evidence in the textarea, and submits it to Admin review.

STEP 5 — ADMIN FEATURES

Admin Feature Inventory

	Feature	Screen	Purpose	Status
	:---	:---	:---	:---
	Admin Login Console	Admin Login	Email/Password entry to log in to dashboard	Partially Implemented
	KPI Counter Cards	Dashboard Tab	Displays active users, partners, bookings, revenue	Partially Implemented

	Today's Bookings Widget	Dashboard Tab	Displays confirmed platform bookings for check-ins	Partially Implemented (Wired)
	User Milestones Manager	Users Tab	Modifies booking requirements and reward structures	Partially Implemented (Wired in Sprint 6)
	KYC Verification Queue	Partners Tab	Manages document queue with viewer modal	Partially Implemented (Wired in Sprint 6)
	Partner List & Message Logs	Partners Tab	Searches partners, logs support text messages	Partially Implemented (Wired)
	Venue Approval controls	Venues Tab	Approves/rejects/suspends venues with alerts	Partially Implemented (Wired)
	Featured Listing Toggle	Venues Tab	Promotes selected venues to homepage slides	Partially Implemented (Wired)
	Booking/Refund Controller	Bookings Tab	Cancels bookings, initiates Razorpay refund payments	Partially Implemented (Wired)
	Slot Reassignment Console	Bookings Tab	Reassigns user booking to a new slot timing	Partially Implemented (Wired in Sprint 6)
	PAV Outstanding Tracker	Finance Tab	Calculates outstanding platform cash balance	Partially Implemented (Wired in Sprint 6)
	Partner Commission editor	Finance Tab	Sets custom platform fee cuts per venue/host	Partially Implemented
	Surge pricing tag editor	Slots/Demand	Selects slots to apply surge/discount factors	Partially Implemented (Wired in Sprint 6)

	Push Broadcast Composer	Notifications	Sends segment-targeted FCM notifications	Partially Implemented (Wired in Sprint 6)
	Review Moderation Panel	Reviews Tab	Approves or flags/hides user reviews	Partially Implemented (Wired in Sprint 6)
	Chat Log Auditing	Messages Tab	Audits user-partner chat transcripts	Partially Implemented (Wired in Sprint 6)
	Tournament Coordinator	Tournaments	Approves or cancels tournament listings	Partially Implemented
	Coupons Generator Form	Coupons Tab	Configures promo codes, expirations, and audiences	Partially Implemented (Wired)
	Content Carousel Manager	Content Tab	Manages slide images and homepage layouts	Partially Implemented (Wired)

Admin Actions & Screen Access

Approving Partners (KYC Queue) : Admins access the ****Partners Tab****, filter by "Pending KYC", and click "View Document" next to a partner. The ****KYC Document Viewer**** modal loads the PDF/Image from S3. The admin clicks "Verify" to activate the partner, which triggers an automated notification.

Approving/Suspending Venues : Admins navigate to the ****Venues Tab****, showing listed assets. Clicking "Approve" adds the venue to the user app's searchable listings. Clicking "Reject" or "Suspend" opens a reason box; submitting blocks the venue from search and alerts the partner.

Managing Bookings & Reassignments : In the ****Bookings Tab****, admins can search bookings by reference. If a user requests a change, the admin clicks "Reassign", inputs a new slot ID, and confirms. The platform updates the E-ticket and notifies the partner.

FCM Broadcast Campaigns : Admins open the ****Notifications Tab****, enter the push message text, select targets (e.g., "Delhi", "Football Players"), and click "Send Broadcast". The log table updates, tracking delivery rates.

Dynamic Surge Pricing (Demand Tags) : Admins go to the **Demand Tab**, pick a venue, select slots, select a tag (e.g. "Surge (+20%)" or "Rainy Day (-15%)"), and click apply. Prices instantly adjust, and search triggers dynamic prices.

Financial Auditing (PAV Ledger) : In the **Finance Tab**, the admin opens the "PAV Tracking" sub-tab to inspect bookings that selected cash-at-venue payments. The dashboard calculates the cumulative outstanding balance due from partners to be recovered in upcoming settlements.

STEP 6 — SCREEN INVENTORY

User Screens

1. Splash Screen (`/`)

- * **User Type:** Athlete/Guest

- * **Purpose:** Displays app logo and boot animation, checks for active session tokens to auto-login.

- * **Connected Features:** Splash animation, auto-login redirect, TokenStore session fetch.

2. Landing Website (`/landing`)

- * **User Type:** Athlete/Guest

- * **Purpose:** Marketing platform benefits, showcasing top venues, offering buttons to log in/sign up.

- * **Connected Features:** Featured carousel banner, featured venues slider, Login/Signup redirect CTAs.

3. Login & Signup Screen (`/login`)

- * **User Type:** Athlete/Guest

- * **Purpose:** Enforces multi-mode verification (phone OTP / email password) and profile creation.

* **Connected Features:** OTP SMS request, verify OTP, social auth icons, forgot password wizard.

4. **Location Selection (`/location-prompt`)**

* **User Type:** Authenticated User

* **Purpose:** Requests GPS access or manual city inputs before booking.

* **Connected Features:** Geolocation detector, manual city directory.

5. **Main Dashboard Portal (`/main`)**

* **User Type:** Authenticated User

* **Purpose:** Wrapper housing the bottom navigation bar and rendering tabs.

* **Connected Features:** Navigation tabs container, Notification bell header, chat bubble chatbot.

* **Tabs Rendered:**

* **Home Tab:** Lists venues, search input, sport filter buttons, area filter, sort dropdown.

* **My Bookings Tab:** Active/upcoming bookings list, cancel button, RefundStatusBadge.

* **Statistics Tab:** Gamified KPIs (play hours, bookings completed, tournaments joined).

* **Milestones Tab:** Milestone badges displaying locked/unlocked statuses.

* **Coupons Tab:** Coupon wallet listing active promo codes.

* **Tournaments Tab:** Tournaments list, filter search, TournamentCancelledBanner.

* **Profile Tab:** Profile fields (DOB, Gender, Lang), edit profile button, Sign Out.

6. **Venue Details & Slots (`/detail`)**

* **User Type:** Authenticated User

* **Purpose:** Detailed venue review, operational information, reviews list, slot picker grid.

* **Connected Features:** Photo slider, amenities, reviews list, Date Picker, SlotButton status checker.

7. **Checkout & Payment (`/payment`)**

* **User Type:** Authenticated User

* **Purpose:** Booking calculation, applying coupons, selecting payment mode, card/UPI inputs.

* **Connected Features:** Price breakdown, convenience fee calculator, Razorpay popup checkout, PAV toggle.

8. **Booking Confirmation Screen (`/confirmed`)**

* **User Type:** Authenticated User

* **Purpose:** Success checkmark confirmation, displays QR entry code and booking reference.

* **Connected Features:** QR Code display, print/save options.

Partner Screens

1. **Partner Login Screen (`/partner/login`)**

* **User Type:** Venue Host/Partner

* **Purpose:** Authentication portal using phone OTP login.

* **Connected Features:** OTP request, OTP comparison verification.

2. **Partner Dashboard Wrapper (`/partner/app`)**

* **User Type:** Authenticated Partner

* **Purpose:** Multi-tab layout for partner operations.

* **Connected Features:** Header Notification bell, QR Check-in scanner button.

* **Tabs Rendered:**

* **Home Tab:** KPI cards, Today's Bookings widget, review reply section.

* **Payments Tab:** Bank settings, settlements history table, refund notifications list, Disputes inbox.

* **Venues Tab:** Active venue list, "+ Add Venue" 8-step wizard, "+ Create Tournament" form, operational slot scheduling grid.

* **Analytics Tab:** Revenue trend charts, hourly demand visualization, CSV export.

* **Profile Tab:** Business profile editing, KYC document uploads, Dark mode toggle, Sign Out.

Admin Screens

1. **Admin Login Portal (`/admin/login`)**

* **User Type:** Admin

* **Purpose:** Email and password authentication console.

* **Connected Features:** Password check, admin token save.

2. **Admin Operations Portal (`/admin/dashboard`)**

* **User Type:** Authenticated Admin

* **Purpose:** Central operations control board with sidebar navigation.

* **Connected Features:** Sidebar tabs, theme selector.

* **Tabs Rendered:**

* **Dashboard:** Core KPIs (revenue, users, bookings), Today's Bookings widget, trends charts.

* **Users:** Registered users database, milestone triggers and rewards configurator.

* **Partners:** Partner table, KYC Document Queue listing, KYCDocumentViewer modal.

* **Venues:** Venue approvals interface, featured venue toggles, wishlist count details.

* **Bookings:** Comprehensive booking ledger, slot reassignment buttons, booking cancellations.

* **Finance:** Transaction ledger, PAV Tracking ledger, Commission Rate editor.

* **Notifications:** Broadcast notification composer, delivery success rate dashboard logs.

* **Reviews:** Moderation page to flag/approve user comments.

* **Messages:** Audits partner-user chats.

* **Demand:** Surge pricing modifier grid (surge, rainy day multipliers).

STEP 7 — ROLE MATRIX

	Feature Name	Athlete/User	Venue Partner	Platform Admin
	:---	:---:	:---:	:---:
	Browse & Filter Venues	✓	✗	✗
	Submit Venue Review	✓	✗	✗
	Apply Coupon Discount	✓	✗	✗
	Pay Deposit / PAV split	✓	✗	✗
	Cancel Booking (Self)	✓	✗	✗
	View Own Milestone Badges	✓	✗	✗
	Register for Tournament	✓	✗	✗
	AI Support Chat	✓	✓	✗
	Access In-App Inbox	✓	✓	✗

	Block / Unblock slots	✕	☑	✕
	Add Venues (Wizard)	✕	☑	✕
	Submit KYC Documents	✕	☑	✕
	Reply to User Reviews	✕	☑	✕
	Submit Dispute Statement	✕	☑	✕
	Launch Tournament	✕	☑	☑
	Export Earnings CSV	✕	☑	✕
	Approve / Suspend Partners	✕	✕	☑
	Verify KYC Documents	✕	✕	☑
	Approve / Suspend Venues	✕	✕	☑

	Set Custom Commissions	✕	✕	☑

	Broadcast push alerts	×	×	✓
	Edit Milestone triggers	×	×	✓
	Moderate Review Feed	×	×	✓
	Monitor Chat Logs	×	×	✓

STEP 8 — USER JOURNEY RECONSTRUCTION

Athlete / User Journey

1. ****App Installation & Splash:**** The user launches the application, sees the splash animation, and is directed to the ****Landing Screen****.
 2. ****Registration / Login:**** The user clicks "Get Started". At the Login Screen, they input their mobile number and click "Send OTP." They enter the 6-digit code received via SMS, triggering verification and registration.
 3. ****Location Selection:**** The user is prompted to grant location access or choose a city (e.g., Delhi, Bangalore) to filter local turfs.
 4. ****Discovering Venues:**** The user lands on the Home Screen, filters list by "Football", selects sorting "Price: Low to High", and clicks on a preferred turf card.
 5. ****Slot Selection:**** The user views the venue details, reviews, and slides through the calendar dates. They select two available slots (e.g. 6:00 PM - 7:00 PM) showing a price of ₹1,200.
 6. ****Booking & Promo Application:**** The user clicks "Book Now." At the checkout screen, they select a coupon discount from their wallet (reducing price by 10%), and choose "Online Payment."
 7. ****Razorpay Payments:**** The checkout opens the Razorpay checkout overlay. The user enters dummy test card details and clicks pay.
 8. ****Confirmation & E-Ticket:**** The payment webhook executes, confirming the booking. The app displays the E-Ticket with booking ID and entry QR code.
 9. ****Check-in & Play:**** The user arrives at the turf, presents the QR code on their phone to the manager, gets scanned in, and plays.
 10. ****Review Submission:**** After playing, the user opens the booking history, writes a review, sets a 5-star rating, and submits.
-

Venue Partner Journey

1. **Partner Registration:** A host registers via the Partner App using phone verification.
2. **KYC Documents Submission:** In the Profile Tab, the partner enters business details (GSTIN, bank account) and uploads files (PAN, GST Certificate, Bank statements).
3. **KYC Verification:** The partner waits until the status changes from "Pending" to "Verified" (approved by Admin).
4. **Adding Venue Assets:** Once verified, the partner goes to the "Venues" tab, clicks "+ Add Venue" and completes the 8-step creation wizard (entering name, address, amenities, sport types, and photos).
5. **Configuring Slot Timings:** Under the created venue page, the partner accesses slot scheduling. They choose operational dates and check time boxes (e.g., 6:00 AM to 10:00 PM) with a base price of ₹1,000, and click "Create Slots."
6. **Slot Blocking (Maintenance/Offline Booking):** The partner blocks specific slots for offline maintenance or local tournaments, turning slot cards grey-striped.
7. **Check-in Scanning:** When athletes arrive, the partner clicks "Scan Ticket", opens the QR scanner overlay, matches the player's QR code, and completes their session check-in.
8. **Review Replying:** The partner checks feedback on the dashboard, clicks "Reply" to reviews, and types responses to interact with users.
9. **Earnings & Analytics:** The partner reviews dashboard trends, checks the payout history list, and clicks "Export CSV" to audit weekly payouts.

Platform Admin Journey

1. **Dashboard Review:** The admin logs in using email/password, inspecting real-time platform bookings, active users, and platform revenue.
2. **Partner Verification:** The admin sees a notification in the KYC queue, opens the partner document viewer, reviews the uploaded documents, and clicks "Verify."
3. **Venue Approvals:** The admin reviews pending venues, inspects their photos, and clicks "Approve", publishing them to the user app.
4. **Applying Dynamic Surge:** On the Demand Tab, the admin selects peak hours (e.g. Friday evening) on a popular turf and applies a "Surge (+20%)" tag to adjust booking costs.
5. **Campaign Broadcasts:** The admin composes a broadcast message (e.g., "15% off badmintons this weekend!"), filters by sport "Badminton", and triggers a push alert.
6. **Handling Cancellations & Disputes:** The admin monitors booking disputes, reviews evidence, issues refunds for cancellations, or uses the slot reassignment console to move bookings.
7. **Review Moderation:** The admin moderates the reviews list, flagging inappropriate comments and approving helpful ratings.

STEP 9 — BUSINESS MODEL RECONSTRUCTION

Based on the visible UI features, the platform's business model is reconstructed below:

Core Business Model

The platform operates as a **two-sided sports venue booking marketplace**.

The Customers: Sports players/athletes (Demand side) and sports facility owners/partners (Supply side).

Who Pays: Athletes pay for booking slots and tournament registration fees. Partners pay platform commission on bookings.

Who Receives Money: The platform collects payment online, and redistributes earnings to partners after fees deductions.

Platform Revenue Source: Platforms monetize by charging fees on checkout transactions and retaining commissions on bookings.

Revenue Streams

Booking Commissions (3% Platform fee): The platform retains a 3% commission on the total value of bookings. It can be changed according to admin and updated to other portals.

Convenience Fees (4% Checkout fee): Charged to athletes during online checkout (Card/UPI) to cover payment processing fees. This is only taken from the user.

Pay-at-Venue Adjustments: For PAV bookings (30% deposit online + 70% cash at venue), the platform adjusts commissions. The 3% fee on the total booking is tracked, and any unpaid commission is deducted from the partner's online payout during weekly settlements.

Tournament Listing Fees: The platform takes a percentage cut on tournament entries registered through the app.

Featured Venue Subscriptions (Premium listings): Admins toggle venues as "Featured" to list them in the premium carousel. This feature is monetized by charging partners a subscription fee for premium search placement.

Marketplace Structure

...

[ATHLETES / DEMAND]

| ▲

Pays ₹ | E-Tickets, QR codes,
& Convenience | Slot Bookings

▼ |

[APOV PLATFORM GATEWAY]

| ▲

Deducts 3% | Lists Turf Slots,
Commissions | Schedules & KYC

▼ |

[VENUE HOSTS / PARTNERS]

...

* **Supply Side:** Partners list courts/turfs to fill empty/idle slots.

* **Demand Side:** Athletes browse, book, and secure slots in real-time.

* **Value Flow:** Athletes pay online, the platform handles deposit security, and issues payout settlements to partners while taking platform commissions.

STEP 10 — FEATURE COMPLETENESS

An assessment of the feature implementation status:

Feature Completion Status

Fully Implemented (100%)

Razorpay Webhook Verification

Status: Complete

Ready:

- Raw request body parsing
- SHA256 signature verification
- Payment authenticity validation
- Booking status confirmation after successful payment

Remaining Work: None

Dark Mode Toggle

Status: Complete

Ready:

- User application theme switch
- Partner portal theme switch
- Admin panel theme switch
- Theme persistence across sessions

Remaining Work: None

Partially Implemented

User Authentication (85%)

User Login & Registration

Ready:

- Registration forms
- Login forms
- OTP verification flow
- OTP countdown timer
- Backend authentication routes

Remaining Work:

- Final end-to-end testing
 - Production authentication validation
-

Partner Login & Registration (85%)

Ready:

- Partner onboarding screens
- OTP verification workflow
- Authentication APIs

Remaining Work:

- Final integration testing
-

Admin Login & Session Management (85%)

Ready:

- Admin authentication screens
- Password verification
- Token storage mechanism

Remaining Work:

- Session validation testing
-

Venue Management

Venue Setup Wizard (85%)

Ready:

- Multi-step venue creation flow
- Venue information forms
- Save and update routes

Remaining Work:

- Final API integration testing
-

Venue Search & Filters (85%)

Ready:

- Search functionality
- Sport filters
- Area filters
- Sorting options
- Query routing

Remaining Work:

- Live data testing
-

Venue Detail Screen (80%)**Ready:**

- Venue information display
- Amenities section
- Photo gallery
- Venue overview

Remaining Work:

- Production content integration
-

Multi-Turf Support (65%)**Ready:**

- Multiple venue management structure
- Turf assignment logic
- Slot association

Remaining Work:

- End-to-end operational testing
-

Slot & Booking Management**Slot Management Console (85%)****Ready:**

- Slot creation

- Slot timing configuration
- Pricing setup
- Availability management

Remaining Work:

- Live booking conflict testing
-

Booking Checkout Flow (80%)

Ready:

- Booking calculations
- Coupon validation
- Booking creation workflow

- Template management

STEP 11 — PRODUCT SUMMARY

"What ATPov Actually Does"

Athlete's POV (APOV) is a **fully integrated, multi-sided sports facility marketplace** designed for the modern sports ecosystem. It digitizes the booking workflow, turf schedules management, and platform administrations.
